

Working Safely with Mobile Equipment

OHBA Safety Pages

Excavators, dump trucks, graders, rollers, and other mobile equipment play key roles in the road, parking lot and foundation building industry. However, mobile equipment can pose a risk to nearby workers, especially when the operator cannot see them. By following the safety work practices listed below, you can help reduce the risk of injury when working with mobile equipment.

Safety Work Practices

Operators

- Ensure that workers are clear of the equipment before operating it.
- When operating mobile equipment, carry the load no higher than necessary to avoid limiting your vision.
- Avoid using cell phones while operating mobile equipment.

Nearby Workers

- Before starting work, ensure that you are aware of all mobile equipment operating in and around the site.
- Wear high visibility apparel when working with or near mobile equipment.
- Do not take shortcuts across areas where mobile equipment is working.
- Keep in eye contact with the operator when working near moving machinery or equipment.
- If you use a cell phone, be aware that it can distract your attention from hearing or seeing mobile equipment as it moves around the site.
- Maintain adequate distance from the swing radius of the excavator's turret and bucket.
- Never work under a suspended load including the bucket.

The information we provide is not intended to include all possible safety measures and controls. In addition, the safety information we provide does not relieve the Members of its own duties and obligations with regard to safety concerns, nor does Oregon Home Builders Association guarantee to the Members or others that the Member's property, job sites and/or operations are safe, healthful, or in compliance with applicable laws, regulations or standards. The Members remain responsible for their own operations, safety practices and procedures and should consult with legal counsel as they deem appropriate.
